Re: BMP San Antonio License Company, LP
KZDC (AM), San Antonio, Texas
Facility Identification Number: 65330
Special Temporary Authority

Dear Counsel:

This is in reference to the request filed June 13, 2007, on behalf of BMP San Antonio License Company, LP ("BMP"). BMP requests extension of the special temporary authority ("STA") granted on December 13, 2006, to operate Station KZDC pursuant to Section 73.1615.¹ In support of the request, BMP states that, due to the complexity of the two-site facilities authorized by the permit, it has not been able to complete construction of new facilities authorized by Construction Permit BP-20060726ASG within the initial STA term.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that the licensee has made progress toward restoration of licensed operation, but additional time is required for completing the work. Thus, extension of STA is warranted.

¹ KZDC is licensed for operation on 1250 kHz with 1 kilowatt daytime and 1 kilowatt nighttime, employing a directional antenna during nighttime hours only (DA-N-U). Construction Permit BP-20060726ASG authorizes construction of separate daytime and nighttime directional antenna facilities for operation with 25 kilowatts daytime and 2 kilowatts nighttime (DA-2-U).

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station KZDC may continue to operate pursuant to Section 73.1615 and the terms and conditions of Construction Permit BP-20060726ASG. In particular, the following modes of operation are authorized:

1. During daytime hours, from the authorized daytime site, with a nondirectional antenna and operating power not to exceed 6.25 kilowatts, only for the purpose of nondirectional proof of performance measurements. Reduce power to one kilowatt or less during any significant period of time when proof measurements are not being made.
2. During daytime hours, from the authorized nighttime site, with a nondirectional antenna and operating power not to exceed one kilowatt.
3. During daytime hours, with the substantially adjusted daytime or nighttime directional patterns and powers authorized by the permit, only as necessary for final adjustment and directional proof of performance measurements. Reduce power to one kilowatt or less during any significant period of time when proof measurements are not being made.
4. During nighttime hours, with a nondirectional antenna and operating power not to exceed 0.25 kilowatt.²
5. During nighttime hours, with the substantially adjusted directional pattern authorized by the permit, and reduced power not to exceed one kilowatt.

It will be necessary to further reduce power or cease operation if complaints of interference are received. BMP must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. See 47 CFR § 1.1310.

This authority expires on **June 19, 2008**.

Sincerely,

Charles N. Miller, Engineer
